6. Project Testing Phase

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Project Phase Document

Testing Objective

Testing verifies that the configured ServiceNow flow performs the required laptop procurement actions correctly.

Test Cases

- TC01 – Submit/prepare a standard laptop request. Expected: request is available for the configured process.
- TC02 – Satisfy the required approval/process condition. Expected: configured flow execution starts.
- TC03 – Verify short description update. Expected: configured short description is applied.
- TC04 – Verify assignment group. Expected: task is assigned to Hardware.
- TC05 – Verify complete execution. Expected: all configured actions finish without an error.

Test Result Template

Record Pass/Fail status and a screenshot for each test case. Any failed test should include the observed result, correction made, and retest result.

Expected Outcome

The complete workflow should process the standard laptop request through the configured automation and produce a task with the required updated information and Hardware assignment.

Testing Evidence

Upload execution screenshots, test-case sheet, and final test results to the GitHub testing folder.
