7. Project Documentation Phase

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Project Phase Document

Project Summary

This project documents the automation of standard laptop procurement using ServiceNow Flow Designer.

Documentation Contents

- Project title and abstract.
- Introduction and problem statement.
- Objectives.
- Existing manual process and limitations.
- Proposed automated process and advantages.
- Methodology and workflow.
- Technologies used.
- Modules and system design.
- Flow Designer implementation.
- Testing and results.
- Conclusion and future enhancement.

Conclusion

The project demonstrates how a standard laptop procurement workflow can be organized and automated using ServiceNow Flow Designer. Automating repetitive updates and assignment activities can make the process more consistent and traceable.

Future Enhancements

- Add automated notifications to requesters and Hardware team members.
- Add additional laptop models or procurement categories.
- Add escalation or reminder steps for delayed approvals.
- Add reporting and dashboard views for procurement tasks.

Submission Checklist

- Final project report PDF.
- Presentation file.
- Flow screenshots.
- Testing evidence.
- Demonstration script/video reference.
- Public GitHub repository link.
